Host to Guests from Many Lands

In a few days time Saskatchewan will be playing the part of host. Her guests will gather from all the lands under the sun to share Saskatchewan hospitality and to glean the profits of social intercourse and the exchange of views and experiences. It will be a great opportunity.

The world wide interest shown in the World's Grain Exhibition and Conference and the extraordinary response from the citizens of all nations to the invitations extended are, to me, a "sign of the times" — a portent that, there has come to humanity the determination to free itself of old servitudes, to become masters of destiny, and to replace the chaos of chance with the managed order of a planned and consciously controlled social system.

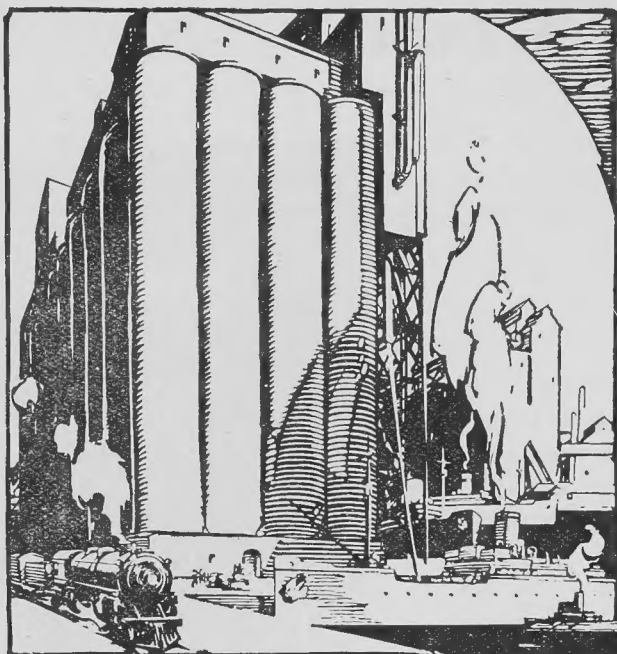

Recognition of the interdependence of the whole human race reaches in ever widening circles through the nations. The progress of science and the industrial arts is rapidly converting the whole world into one great neighborhood and we of this generation see the beginnings of that movement which promises for the first time in the history of man a world of peace and amity. The privilege of helping to that end is ours for the taking and of the many opportunities that will present themselves we are little likely to find a better one than that coming Grain Exhibition and Conference. Let us see to it that our guests from other lands leave us regretfully and carry with them a fadeless assurance of our goodwill and the conviction that in all things making for amity Saskatchewan is earnest to play her part.

On behalf of the Government and the People of the Province of Saskatchewan I wish to extend most cordial greetings to all the exhibitors and visitors who may sojourn with us during the weeks of the World's Grain Show and Conference, coupled with the hope that your stay among us may be both pleasant and profitable and that the memories you carry with you as you return to your various homelands may linger as oft recurring and pleasant recollections of a frugal, industrious and hospitable people, striving in co-operation with nature to carve for themselves a niche in the structure of that great brotherhood of man which we believe to be the ultimate destiny of the nations of the world.

THE WORLD GRAIN CONFERENCE.

This event, drawing together the World's leading authorities on grain production, research and merchandising, will open under the distinguished patronage of His Excellency the Earl of Bessborough, Governor-General of Canada, at 11 a.m. Tuesday, July 25, at the Armouries, Regina.

Leading scientists, economists, producers and industrialists from the great producing, exporting and importing countries of the world will attend and address the Conference.

Morning and afternoon sessions will be held except Saturday, July 29th, when the delegates and members will visit the Dominion Experi-

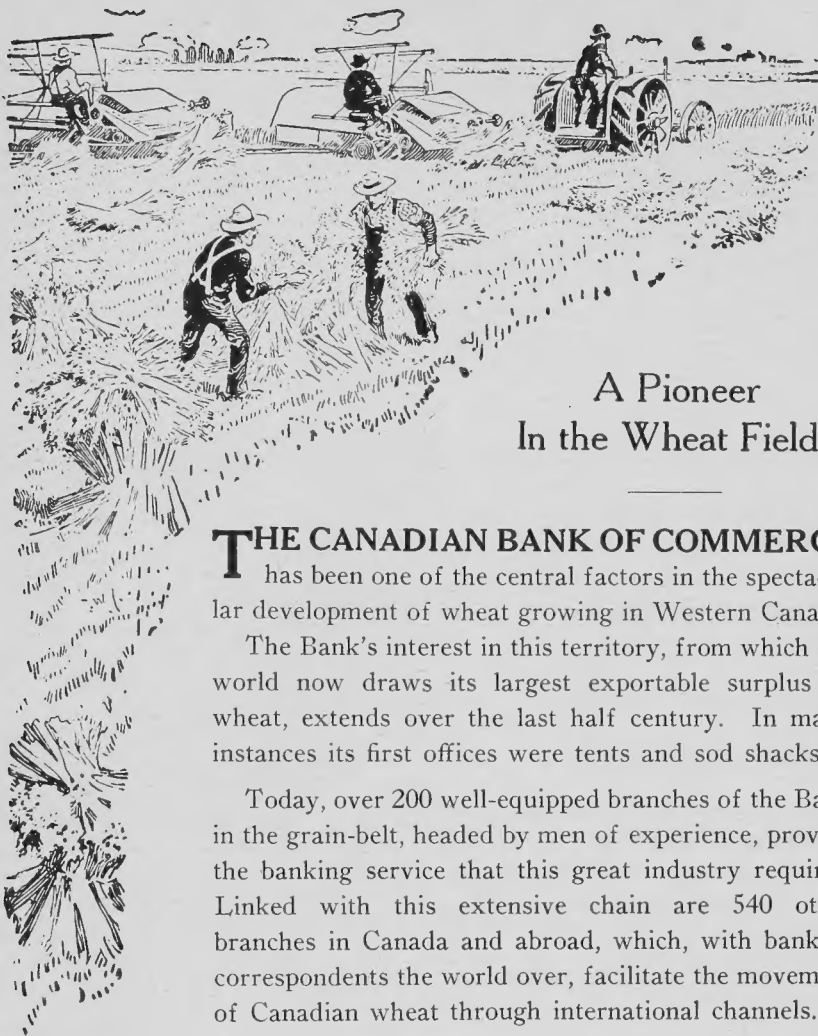

Take out membership in the World's Grain Exhibition and Conference to enjoy all the benefits of this World Event. See Page 16 for full particulars.

Attend the international conference sessions at the Armouries each morning and the sessions of technical agriculturists each afternoon at Regina College and adjoining buildings.

The general administrative offices of the World's Grain Exhibition and Conference and the Accommodation Bureau office are located in the Merchants Bank Building, Eleventh Avenue.

Dr. E. S. Archibald, B.A., B.S.A., LL.D., D.Sc., Director, Dominion Experimental Farms, Ottawa, whose activity as chairman of the Conference Programme Committee is mainly responsible for the gathering together of leading scientists, economists, producers and industrialists from the great producing, exporting and importing countries to discuss the many practical and scientific grain problems confronting the world.

A Pioneer In the Wheat Fields

THE CANADIAN BANK OF COMMERCE
has been one of the central factors in the spectacular development of wheat growing in Western Canada.

The Bank's interest in this territory, from which the world now draws its largest exportable surplus of wheat, extends over the last half century. In many instances its first offices were tents and sod shacks.

Today, over 200 well-equipped branches of the Bank in the grain-belt, headed by men of experience, provide the banking service that this great industry requires. Linked with this extensive chain are 540 other branches in Canada and abroad, which, with banking correspondents the world over, facilitate the movement of Canadian wheat through international channels.

mental Farm and Forestry Station, Indian Head. No evening technical programmes have been planned except for such special committees as the various groups may find necessary.

Under the leadership of the Honourable Robert Weir, Minister of Agriculture, and the Honourable W. C. Buckle, Minister of Agriculture for Saskatchewan, the solution of our present day difficulties in the grain trade will be the basis for Conference considerations.

AGRICULTURAL PRODUCERS AND TRADE ORGANIZATIONS CO-OPERATING.

An outstanding feature of the Conference is the fact that leading producers of grain and all channels of the grain trade will appear to present and discuss the practical and scientific problems of the world's grain situation. In the morning sessions, especially, leadership will be given by producers' organizations of Canada and other countries including the Pools and Co-operatives, while equally the world's leading Grain Exchanges and other Grain Trade channels will unite to discuss means for improvements.

SCIENTIFIC GROUPS AFFILIATED.

As a group of science meetings the Conference will be outstanding. Never before in the history of this country has there been an occasion when scientists of every specialty will simultaneously concentrate their attention on the problems of grain production and distribution.

Canadian Science Societies in annual convention at Regina during the convention form the structure for technical programme organization. These are as follows: Canadian Society of Technical Agriculturists and many affiliated societies such as the Canadian Phytopathological Society, Western Canadian Society of Agronomy, Canadian Society of Animal Production and the special groups of Plant Breeders, Agricultural Economists, Agricultural Engineers, Soils Chemists, Agricultural Metriologists, etc., and also the Great Plains Society of Entomologists and the Canadian Seed Growers' Association.

SCOPE OF THE CONFERENCE.

It might be asked if this is to be just another conference filled with lengthy and tiresome, often non-understandable, speeches from which no constructive national or world thought and action may evolve. This cannot be. The problems are too vital, the eminence of the chairmen and the high calibre of the leaders in discussion too great for such to happen.

Coming as it does after the main sessions of the World Economic Conference are completed this Grain Conference should be doubly important to discuss ways and means of application of the new international agreements and policies. Obviously this is a Conference informative to all who attend and to the world at large.

The Conference will afford an opportunity to direct much needed attention to the enormously important position agriculture occupies in

the economic life of all nations, importing as well as exporting, and conceivably to point the feasible way to a rational stabilization of the general commodity price level and also of normal business activity throughout the world.

ARRANGEMENT OF PROGRAMME.

The morning sessions, open to those who attend the Exhibition will be held in the Armouries, immediately adjoining the World's Grain Exhibition building and the Exhibition Grounds.

Subjects to be discussed are:

July 26. "*The Present World Situation and Trends*". Under this head will be presented facts re present and probable future acreage and production.

July 27. "*World Cercal Import Requirements*". Authorities from importing countries will discuss this subject from angles of consumption trends, changes in international marketing, wheat surpluses, and Russia in relation to world markets.

July 28. "*World Wheat Surplus. Is Controlled Production Necessary?*" This, with "Wheat Consumption and Depression", governmental proposals for production control and price elevation in U.S.A., and Australian activities will be authoritatively presented. There may be added features to this discussion resulting from the Geneva and London Conferences.

July 29. Study of crop conditions, production problems and experimental and research work at the Dominion Experimental Farm and Forestry Nursery Station, Indian Head, Saskatchewan.

July 31. "*Financing World Wheat Surpluses. Are Changes Needed?*" What shall be the trend in future years of good and bad financial conditions? Can future prices be accurately forecast? To what extent shall the producer finance surplus production; also, the grain trade, the Milling industry or the State?

August 1 and 2. "*Merchandizing Methods in Wheat Marketing. Can Improvements Be Effected?*" Have world producers and consumers an accurate conception of present merchandizing methods and future needs in co-operative or open trade selling, the place of elevator companies, of Grain Exchanges, or of co-operative buying?

August 3. "*Transportation and Storage of World Export Grains. Are Further Economies Possible?*" Canada, may well lead in this discussion with the hope of gaining suggestions for improvement in rates and effectiveness.

August 4. "*Livestock. Its place in Marketing Grains in Countries of Origin and of Import!*" Are the producers of export grains in the four great grain exporting countries building a balanced programme of farming giving livestock its proper place? Do they know the most economical ages and kinds of livestock which may yield highest returns from grain feed? Is the grain exported to countries which import grains and export live stock products yielding cash returns as great as though fed at home?

AFTERNOON SESSIONS.

These deal essentially with production problems in which every farmer is interested. He who has lost crop after crop from rust, root rot, smut, insects, frost, late maturity, soil drifting or many similar causes knows the need for the latest results of research workers.

The sessions will be held in Regina College and adjoining buildings and will be joint sessions with the various technical societies and groups of the Canadian Society of Technical Agriculturists.

The Western Society of Agronomy will discuss improvement of wheat varieties, the meaning of genetics in plant breeding, the relation of the bio-chemist to cereal breeding, winter hardiness, breeding alfalfa and sweet clover, breeding pasture grasses, world trade in herbage seeds, development of the soy-bean in Canada, the distribution of forage crops in Western Canada. There will also be a session on experimental methods (plot work), co-operative grain research and the organization of milling and baking research.

Cultural problems including machinery, rotations, weed control and insect pests will be discussed with other groups, as well as soil drifting and soil moisture.

A joint session of the Agronomy Society, Soils Group and the Cereal Chemists will be held on fertilizers, and outstanding speakers include Dr. E. Truog, Wisconsin, Sir John Russell, Rothamstead, England, Prof. S. A. Waksman, New Jersey, Prof. P. L. Gainey, Kansas and Dr. F. C. Bear, New York.

The Canadian Phytopathological Society will deal with plant diseases. Among the speakers in this group will be Dr. J. A. Clark and Dr. J. B. Humphrey of the Bureau of Plant Industry, Washington.

The Cereal Chemists will discuss the influence of environment on wheat quality, malting properties of barley, quality of soft spring wheat, evaluation of Durum wheats, milling and baking qualities of wheat from various parts of the world and the relation of harvesting methods to wheat quality.

The agricultural Engineering group will deal with the economic effect of mechanization in wheat production, economic use of power in large and small units, combine harvester investigations, mechanization of agriculture in Russia.

A series of papers on Canadian soil work will be presented by the Soils Group while the Canadian Society of Agricultural Economics will outline the economic effect of farm machinery and live stock problems.

During the second week of the Conference the western section of the Canadian Society of Animal Production will discuss range production of cattle and the marketing of grain through the live stock route, contagious abortion, the economic status of the horse industry in western Canada and the place of live stock research. The session on marketing grain through the live stock route will be an open session of the Grain Conference and will be held on Thursday afternoon August 3rd.

The Great Plains Section of the International Crop Pest Committee will hold four sessions on various insect pests affecting grain crops. Speakers will be present from the United States Department of Agriculture and various state institutions.

THE WORLD'S GRAIN EXHIBITION.

A never ending show, a ceaseless panorama of education and entertainment will be presented at the World's Grain Exhibition which opens on July 24. The story of Agricultural, Industrial and Commercial progress, calculated to encourage the despondent and fill the hopeful and ambitious man with new enthusiasm, can be read by all visitors to the World's Grain Exhibition building.

Over forty nations have sent competitive, educational and commercial exhibits. The exhibition, however, is much more than an exhibition of the thousands of samples of grain and seed which have come from practically every cereal producing country in the world. The immense building, with a floor space of nearly three and a half acres and an exhibit frontage of approximately two miles, is filled to capacity with exhibits of an entirely different interest.

The interior decoration of the World's Grain Exhibition building will make its challenge and will impress visitors by its startling and unfamiliar means of achievement, and by the expenditure of consummate ingenuity in the use of relatively inexpensive grains and grasses. These blended in perfect harmony are pleasing to the eye, while the natural seed work challenges the artistry of the mosaic workers of the Caesars.

The competitive exhibits are from Burma, Queensland, Victoria, Western Australia, New South Wales, South Australia, New Zealand,

The following have contributed to the cash prizes in the competitive classes and in the boys' and girls' grain judging competitions: The Saskatchewan Government; Albert Olson Co. Ltd.; Canadian Banks, Bank of Montreal, Bank of Nova Scotia, Bank of Toronto, Canadian Bank of Commerce, Dominion Bank, Imperial Bank, Royal Bank; Canada Malting Co., Canadian Manufacturers' Association; Canadian National Railway; Canadian Pacific Railway; Canadian Wheat Pools; Dominion Mortgage Association; T. Eaton Co. Ltd.; General Motors of Canada Ltd.; Hudson's Bay Co.; Imperial Tobacco Co.; International Harvester Co.; Ontario Equitable Life and Accident Insurance Co.; Sun Life Assurance Co. of Canada; United Cigar Co. Ltd.; Winnipeg Grain Exchange.

Further contributions will be acknowledged in the official program.

The general interior planning and decorating of the World's Grain Exhibition building was under the direction of Mr. Beesley.

The sweeping panorama, the realism of the outdoor world caught and put on exhibition, the ingenuity of the pictorial effects obtained with seeds and grains will astound visitors when admitted to the building.

Mr. Beesley, who was born in England, has been actively engaged in exhibition decorative work in Canada for many years, and has added to the prestige of the Dominion at many a great show in many parts of the world.

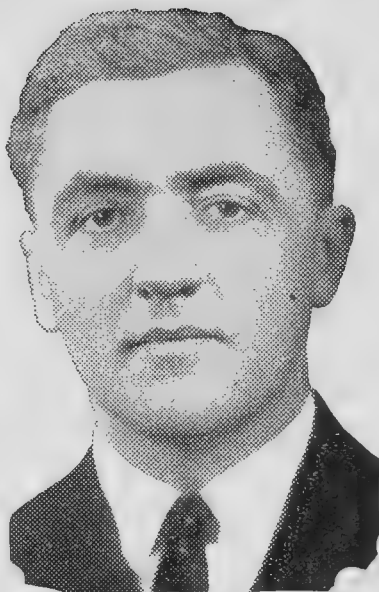

MR. R. J. BEESLEY

Superintendent of Decoration, World's Grain Exhibition Building.

C. M. Hamilton, Winnipeg, a member of the Board of Grain Commissioners, who acted as chairman of one of the most important sections of the World's Grain Exhibition and Conference—the Boys' and Girls' Grain Judging Competitions Committee.

H. S. Fry, B.S.A., Regina, who brought a lengthy and varied agricultural and editorial experience to bear upon the organization work of the World's Grain Exhibition and Conference as chairman of its Publicity Committee.

Exclusive General Sales Agents for Western Canada

South Africa, Southern Rhodesia, British Guiana, Japan, the Philippine Islands, Siam, Germany, England, Scotland, Northern Ireland, Mexico, twenty-four states of the American Union and every province in Canada.

Educational exhibits from the Imperial Council of Agricultural Research, India; Hungary; Siam; Italy; the International Institute of Agriculture, Rome; Mexico; The Jewish Colonization Society; the Empire Marketing Board, London; the Ministries of Agriculture of England, Scotland, Wales and Northern Ireland; the Rothamstead Experimental Station, England; the Department of Agriculture, Victoria, Australia; the Philippine Islands; the Morioka Higher Agricultural College, Tokio, Japan; the Federal Department of Agriculture and the Board of Grain Commissioners, Canada; the Provinces of Canada; the Canadian National and Canadian Pacific Railways; the Board of Harbour Commissioners, Vancouver; the Canadian Society of Technical Agriculturists, the Canadian Seed Growers' Association, and the University of Saskatchewan.

In the east wing scores of commercial exhibits may be inspected. These for the most part represent some phase of the field crop industry—production, transportation, marketing, financing, processing, etc., of crop products, important among them being the exhibits of the English Wholesale Society and the Scottish Co-operative Wholesale Society.

The competitive exhibits, arranged in glass covered cases, will occupy the centre of the main court on each side of the Royal Pavilion. This decorative feature beautifully designed and wonderfully interesting will house championship samples from each of the 57 classes.

A wonderful model of the Alberta ranch of H.R.H. the Prince of Wales constructed to scale in its minute details occupies the west end of the main section. This model was brought over from the Crystal Palace, London, where it attracted many thousands of sight-seers.

Immediately adjoining will be found the Saskatchewan exhibit, which depicts the natural resources of the province. The beautiful light and shade effects of the background of this display and the exceptional educational value of the component parts of the exhibit will be a delight to all visitors.

A feature of the exhibit from the province of Quebec will be a display of art craft and needlework, while women will be actually seen at work on their looms weaving the brilliantly colored fabrics which are now becoming so fashionable throughout the world.

The displays of the natural resources of Alberta, Manitoba, and Ontario are all outstanding. The visitors from other countries will get a vivid picture of Canada's potential wealth and her scenic beauties.

The educational exhibits from India and Siam are the largest and most comprehensive ever sent from these countries to any exposition. Included in Siam's exhibit are jewels worthy of a place in the crown of Kings.

From an exhibition point of view there will be something educational and entertaining for all. A leisurely walk of almost two miles along the exhibit frontage of the immense Grain Exhibition building will provide most of the thrills and sight-seeing experiences of a trip round the world.

One of the greatest anxieties of visitors to huge exhibitions is lack of or indefinite information regarding suitable accommodation. As chairman of the Accommodation Committee George C. Rooke has seen to it that accommodation will be available when the thousands of visitors throng to the World's Grain Exhibition and Conference.

REDUCED RAILWAY RATES

From all stations in Canada to Regina, fares have been authorized by the Canadian Passenger Traffic Association on the basis of one and a quarter fare for the return trip, with dates of sale, July 22 to August 4 inclusive, and August 8 the return limit. This arrangement has been tendered to railway companies in United States Associations to enable them to make through fares from their territory on the same basis.

On Monday, July 24, Wednesday, July 26, and Tuesday, August 1, tickets at 1½ cents per mile with a four-day limit will be available within the territory Armstrong, Port Arthur west, and Vancouver east. Tickets purchased in British Columbia will have an 8 day limit. These rates do not apply to Vancouver Island, or to coastal steamship rates.

TRACTOR FUEL

FARMERS

USE HI-WAY TRACTOR FUEL AND SAVE MONEY

Before Hi-Way Refineries opened farmers could purchase only high-priced gasoline and kerosene for tractor purposes.

Hi-Way introduced TRACTOR FUEL — and the immediate demand taxed the capacity of the Refinery.

Save four to ten cents a gallon by insisting upon HI-WAY TRACTOR FUEL.

Hi-Way Refineries brought the price of gas down. Stand behind the Saskatchewan-owned plants.

AN EXTENSIVE GRAIN

UNITED GRAIN GROWERS' TERMINAL ELEVATOR

United Grain Growers own and operate more than 450 elevators at country stations in the prairie provinces of Western Canada.

The Company's terminal elevator at Port Arthur, Ont., at the head of navigation on the Great Lakes, has a capacity of 5,500,000 bushels. Its terminal elevator at Vancouver has a capacity of 2,600,000 bushels.

This elevator equipment insures that grain is continuously flowing to the markets of the world through the facilities of United Grain Growers. Through its country elevators the Company is in constant touch with conditions in Western Canada, while its offices at market centres maintain contact with all markets where Canadian grain is bought and sold.

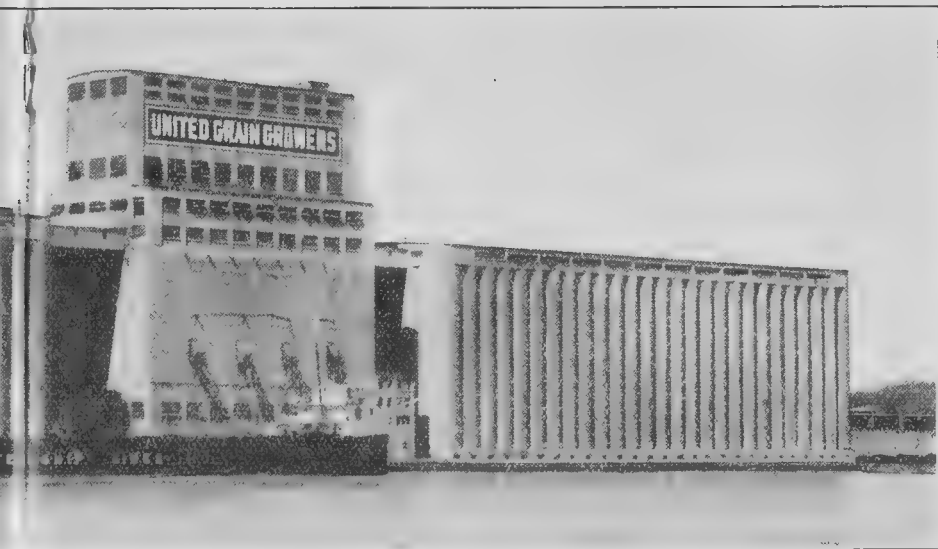

Additional services are rendered to farmers through the distribution of large quantities of farm supplies, the most important of which are coal,

flour and binder twine. This service covers other districts as well as those in which are situated the Company's country elevators.

Commencing as a small organization in 1906, this Company's body of farmer shareholders grew rapidly to more than 30,000. These have invested more than \$3,000,000 in the business of the Company, while reserves and surplus increase the capital resources of United Grain Growers to more than \$5,000,000. Thus the Company was able to increase its equipment as the business grew, and to provide the working capital necessary to conduct a large enterprise.

Since its inception it has been the constant endeavor of the Company to maintain leadership in giving business service to Western farmers, and as well to contribute in other ways to the welfare of Canadian agriculture.

THE WORLD'S GRAIN EXHIBITION AND CONFERENCE BUILDING

This building, costing \$200,000, was erected specially for the World's Grain Exhibition and Conference, is of steel construction and stucco finish. It has a floor area of 148,000 square feet; and the frontage of exhibits—national, commercial and competitive—will measure approximately two miles. This is the largest exclusive grain and seed exhibition building in the world.

INTER COLLEGE GRAIN JUDGING TROPHY:

This beautiful silver trophy will be presented to the team in the Inter-College Grain Judging Competition which scores the highest grand aggregate.
